

# 2011 VOLT **ADDING FUEL**

The Chevrolet Volt is equipped with a pressurized fuel tank and requires a specific refueling process to control evaporative emissions.

## **FILLING THE FUEL TANK**

1. Press the Fuel door release button, located on the driver's door, for one second. A WAIT TO REFUEL message will display on the instrument cluster.
2. When the READY TO REFUEL message displays, the fuel door on the passenger's side of the vehicle will unlock. It will not open automatically.
3. Press in the rear edge of the fuel door and release to open the door to refuel the vehicle.

**IMPORTANT:** Premium fuel with an octane rating of 91 or higher is recommended.

**PLEASE NOTE:** If the 12V battery is dead the fuel door will not open. You will need to jumpstart the Volt using the remote battery terminals under the hood.
